<b>Course aims:</b> The Minimum chances of citizens in the 21st century in the EU area depend not only on income but also from the social participation of integration. The experience of the globalisation of the economic crisis leads us to building a social dimension of sustainable development. The Centre of attention shall be given the mutual feedback of the economic, environmental social tasks of the objectives. Social policy as a summary of the objectives, activities, means of action to create the conditions for the versatile development of skills, the qualities of the personality of each person. From the wide-ranging perception of social policy features that are manifested in particular in its protective function/passive/, we work towards developing functions, to the development of man, its transformation, education, education, cultivation. At present, the same type of economic and social problems in the European area (unemployment, demographic development, migration, black work, changes in family life, the value of the population, financial barriers in health and education) lead to the need to Work in the EU, to strengthen the integration of the internalisation of solutions. By studying the subject, we obtain a summary of skills knowledge from social policy, social protection, social work services. We can navigate in a wide range of economics, the organisation of funding for health services. EU legislation is a dominant national social dynamic that is funded and implemented.
